

enVisionMATH California Common Core ©2015 is based on years of research on how students learn and what teachers want and need to effectively help their students. The **enVisionMATH California Common Core ©2015** authorship team includes members of the Common Core State Standards for Mathematics K-12 development and review teams and a member of the mathematical progressions writer/reviewer team. All are widely published in books, professional journals, and articles; conduct extensive field research; and are recognized thought leaders in how children learn, teacher education, and professional development.

enVisionMATH California Common Core ©2015 was vetted and approved by the rigorous California instructional materials adoptions process. Since then, it has been successfully implemented in classrooms throughout California. We are proud to develop such programs with proven efficacy, and we strive to continually improve them with the help of input from all our partners, the students and teachers who use our products as well as the array of available evaluation tools.
