

## **Curriculum Associates EdReports Response**

Curriculum Associates is proud to have *Ready Classroom Mathematics* K-5 receive all green ratings from EdReports. *Ready Classroom Mathematics* is the next evolution of *Ready Mathematics*, which was one of only a few “all green”, top rated programs by EdReports in 2017. Since that time, educators have had time to teach with, and see real results from, our blended instructional approach. We welcome the opportunity to share our third party independent research study with educators who are interested in seeing it.

Curriculum Associates greatly values the feedback of educators and leaders in mathematics education, and this includes the EdReports reviewers. While the program explains the rationale for labeling the Mathematical Practices (MPs) in multiple pages in the front of the Teacher’s Guide, we recognize that teachers might benefit from additional point-of-use support in understanding where the identified MPs are highlighted in the lesson. Because we cover all of the MPs, we were concerned that providing this support at point of use in the Teacher’s Guide would be overwhelming. As with all feedback we receive, we will consider how we might address the labeling and support of the MPs in future editions.
